

# Life experiences, mental health and pain

## Participants with and without chronic pain needed for an online study

The study is an online survey in which you will answer some questions regarding your demographic information (gender, age), traumatic events that may have occurred during your childhood and adulthood (such as experiences of abuse, car accidents, etc.), your mental and physical health and certain psychological variables. The study takes on average 20-30 minutes to complete.

**We are looking for both chronic pain patients and people who do not experience chronic pain.**

Participants must fit the following criteria:

- Be over 18 years
- Currently live in the UK
- Be able to take part in the study, e.g. read instructions

**If you would like to take part, you can click on the link below**
