**Others**

Speciality Drs in pain

Everyone!

All of the above 1

Everyone who works in pain

O T's

## 2. Would you recommend this course to colleagues?

### **Please explain: Yes**

The Course provides excellent overview of chronic pain tools/alternatives available.

The course provides valuable clinical experience through live clinics, patient interaction and interesting.

Excellent selection of practically relevant topics and well organised course. Thanks.

Great exposure to advanced services offered in a tertiary pain hospital.

Good to know referral criteria for a particular clinic/interventional procedure.

Highly organised course with up-to-date information about pain medicine.

100%. Excellent. Thank you.

Very well pitched to account for all backgrounds with plenty of opportunities for those with more knowledge experience to ask further questions on a very inclusive and relaxed environment of shared learning.

Great value for money too.

Very relevant.

Good for practitioners and practical.

It is an interesting centre, since you let me have the opportunity to do some complex procedures.

# Liverpool Course on Clinical Management of Chronic Pain

6<sup>th</sup> – 7<sup>th</sup> July 2023

Excellent Course

Learned new things and updated previous knowledge.

Had a really good time. Thanks

Would suggest filter coffee next time.

Overall, I am really satisfied, I believe it can't be any better.

It would be great if can announce future more focused, specified courses

In case presentation session, need more discussion so we can more understand not only the case but also from the diagnosis and further treatment.

Excellent course. Content is extensive. It is useful to have the slides end of the course. Well organised.

The course is tightly packed with content but, if possible, any exam related training would be appreciated and well received by trainees.

Would love to include more study days, on Cancer Pain, pelvic pain, and neuromodulation.

Extremely well organised, very friendly, and approachable facilitators.

Felt very well looked after and welcomed.

Great catering and relevant sponsors who were very professional.

Varied and extremely interesting sessions.

1<sup>st</sup> day quite long and tiring, perhaps try and finish 1 hour earlier.

An inspiring course.

Would be very interested in attending days – Cancer pain - cs/interventional – pelvic pain.

For trainees we get an opportunity to train here even for a few months, it would be great.

Apart from that it was a great opportunity to be part of this programme for 2 days.

Programme from pain management view was something new which I have not seen before.

I would definitely, recommend this to my colleagues who will benefit tremendously, I would, given the chance, will come back here for a fellowship in the future.

Really caring and well organised course.

Very knowledgeable and inspiring speakers, would have liked to have more sessions on dealing with Neurodiverse/non- communicative patients in terms of assessment and management.

Clinics and live-patients were such invaluable experience – thank you for being so accommodating.
